

Rainforest

Presented by:

Tampa's Lowry Park Zoo
Outreach Department

Program Overview

At least five different animals from tropical rainforests will be presented.

Two or more of the following animal groups will be represented:
mammal, bird, reptile, amphibian, and arthropod.

The Animal Ambassador may discuss adaptations, population status, and/or the pet trade involving the animals presented.

The Animal Ambassador may discuss the effects that the rainforest has on humans and/or effects humans have on the rainforest.

The Animal Ambassador may discuss rainforest attributes such as layers, amount of rain, temperature, etc.

Sunshine Standards Related to Program:

The Outreach Department strives to provide programs that are in line with the Sunshine Standards, but please keep in mind that it is possible that the listed standards may not be related to the program presented to you. It is also possible that there are standards that are not listed that may indeed be related to your program. This is merely a light overview of possible standards relationships that could be covered in the presentation by the Outreach Department. It would be impossible for us to guarantee that the exact same program will be repeated each time it is given and that the exact same standard alignment will exist, therefore, you may wish to change the emphasis.

PreK-2:
